## 16. OTHER INFORMATION

- **NFP Hazard Codes**

Health: 1      Fire: 1      Reactivity: 0      Special: None

- **HMIS III Rating**

Health: 1      Flammability: 1      Physical Hazard: 0

NFPA and HMIS use a numbering scale ranging from 0 to 4 to indicate the degree of hazard. A value of zero means that the substance possesses essentially no hazard; a rating system is intended for different purposes, and use different criteria. The NFPA system was developed to provide an on the spot alert to the hazards of a material, and their severity, to emergency responders. The HMIS system was designed to communicate workplace hazard information to employees who handle hazardous chemicals.
